

Child Name: *Lopez, Sofia*
 Child DOB: *3/15/2020*

Service Coordinator: *Raquel Hall*
 IFSP Date: *04/04/2022*

Outcomes

Outcomes are the benefits for your child and family as a result of Early Steps services and supports based on your priorities. The team will develop strategies and timelines to determine progress towards achieving the outcomes.

Outcome # #

Given what you've shared about your family's daily life, what would you like to see happen in your daily routines as a result of Early Steps services?

Sofia will say a word to respond to and initiate interactions with others during mealtimes and playtimes. We will know she can do this when she responds to and initiates interactions with others during most mealtimes and playtimes during the week.

This outcome is related to the following functional area(s):

Developing positive

social-emotional skills

Please describe how progress will look in three months:

Sofia will say a word to someone after they say something to her

Please describe how progress will look in six months:

Sofia will say a word to begin interactions with others

Strategies: Below are the steps to accomplish this outcome and the

The provider will support caregivers to use extra cues during mealtimes and playtimes

Caregivers will provide extra cues during mealtimes and playtimes for Sofia to say a word after waiting

Let's link to the COS!

We can use the periodic COS process and summary ratings to give information about Sofia's progress and her next steps.

IFSP Review: Periodic Review Date(s): 7/5/2022

We did it! We're making progress Let's make adjustment No longer needed Postponed

Progress: Please describe progress toward meeting this outcome.

The periodic COS process indicated that Sofia is interacting more often with her caregivers.

Please describe the next steps:

Sam, the Lopez's Early Steps provider, will continue to coach Sofia's caregivers to support Sofia to say a word back when others talk to her during meals, playtime, and chores.

How will we know the child is using the skill?

How will we know it's working?

Looking at Sofia's progress on her 3- and 6-month indicators helps Sofia's caregivers and provider know when the intervention is working.
